

JOBREADY Audit Report (V1 vs V2 vs V3)

Date: 2026-07-14

Decision basis: V1 Home is final baseline. Identify repeated tasks in V2/V3 and list remaining V2/V3 items for next version selection.

Version Status

V1: Available

V2: Available

V3: Not found in repository (no dedicated V3 entry/home file)

Current active advanced build appears as Phase 7.5 (V2 route structure).

Repeated Tasks Already Present in V1 (Also in V2)

Task / Feature	V1	V2	Action Recommendation
Upload file and start workflow	Present (UploadCard)	Present (UploadCardV2)	Keep single final UX style in V1 baseline, avoid duplicate variants.
Compress tool	Present	Present	No new work unless functionality differs.
Convert tool	Present	Present	No new work unless functionality differs.
Merge tool	Present	Present	No new work unless functionality differs.
Split tool	Present	Present	No new work unless functionality differs.
Extract tool	Present	Present	No new work unless functionality differs.
Compression benchmark access	Present (top action)	Present (top action + tool card action)	Keep one best access point to reduce clutter.
Launch readiness access	Present (top action)	Present (top action)	Keep.

Remaining Parts in V2 Not in V1 Baseline (Candidate List for Next Version)

Candidate Feature (V2)	Status vs V1	Priority Suggestion
Runbook page access	New in V2	High (operations maturity)
Post-Launch control page	New in V2	High (monitoring/control)
PDF Tools workspace quick access	Expanded in V2	Medium-High
Integration Hub (manifest-based API links)	New in V2	High (future-proof integrations)
Payment API abstraction (gateway-ready)	New in V2 layer	High (monetization)
Ad fixed slot + ad-link API layer	New in V2 layer	Medium (can phase after core)
Plan pricing block (3 plans, USD manual config)	New in V2	High (commercial)
Coupon/promo control panel	New in V2	Medium-High
Footer release/support info block	Expanded in V2	Low-Medium

V3 List

No dedicated V3 implementation was found in current files. Suggested approach:

- Treat this report's "Remaining V2" list as the V3 backlog candidates.
- Once you pick features, create a clean V3 entry file and home page with only selected items.

Recommended Selection Order (If You Want Fast, Stable Rollout)

- 1) Integration Hub
- 2) Payment API + 3-plan pricing
- 3) Runbook + Post-Launch control
- 4) Promo/coupon controls
- 5) Ad layer

Prepared for owner selection workflow.
